

Sentinel A1

Boxchip first model which is made with the user in mind.

BOXCHIP

Stay Connected!

About Us

Professional radio manufacturers are sometimes not the best at designing Network Radios.

but then not all makers of Network Radios are the best at producing professional two-way radios!

Introducing Boxchip.

We have more than 10 years professional experience in communications.

We know the cellphone network has weak signal areas; we know that Digital Mobile Radio (DMR) networks can't do the kind of image and video messaging that mobile phones can.

So Boxchip produces devices which seamlessly switch between the phone network and DMR with the best coverage available, wherever you are in the world.

With Boxchip, you can 'Stay Connected', wherever you are!

Available worldwide via our distribution network.

**Boxchip first model
which is made with
the user in mind.**

**More stronger hardened case,
User friendly.**

SENTINEL A1

Boxchip first model which is made with the user in mind.

BOXCHIP
